Adding DTIC Services on your INTRANET

Phyllis Levine

DTIC Annual Users Conference
November 4,1997

Intranet -Defined

A network that is contained within an enterprise. May consist of interlinked local area networks. May include connections through one or more gateways to the Internet.

How is it different from "the" Internet ?

i. Intranet is a network within the organization whereas Internet is a world wide network .

ii. Intranet has access to Internet but not vice-versa.

Why an INTRANET?

- *Improve communication*
- *Improve corporate awareness*
- *Save time..translates to saves $$$*
  1 hour /day per professional
  110 people $20/hr x 260 days $save $56

DTIC
The DTIC Review
The DTIC Review brings its readers the full-text of selected technical reports and a bibliography of other references of interest under one cover. Each volume is $25 and provides a sampling of documents from our collection on a specific topic of current interest. The DTIC Review is also available to DTIC registered users as a subscription product. One subscription costs $85 and includes four quarterly issues on selected topics.
The following issues are available:
Volume 3, Number 2: "Distance Learning," Jun 97
Involves any method of presenting training that is interactive and in which the trainees are physically separated from the trainers.
Paper: AD-A323717 ($25)
Electronically: Free (The electronic version of full-text documents included in this volume are also available through the full-text search capabilities of DTIC's STINET Services.)
Document: Done

Technical Report Awareness Internet Links (TRAIL)
Technical Report Awareness Internet Links (TRAIL) is a group of 25 subject-based electronic mail (E-mail) lists designed to make individuals aware of DTIC's recently acquired unclassified/unlimited (U2) technical reports. (These are NOT interactive lists.) Technical reports are classified according to DTIC's 25 subject fields and 251 groups and subgroups which are described more fully in the Subject Categorization Guide for Defense Science and Technology, Oct 1986, available from DTIC.
TRAIL Details
Anyone may subscribe to any number of field groups in TRAIL through the TRAIL Mail Registration Form. Within minutes, the current citations will be delivered via E-mail to the subscriber's desktop. Customers may subscribe to, or discontinue, any number of lists at one time, however, the E-mail will be delivered as one list per subject category. Every two weeks, E-mail messages with citations in one field group, including the associated groups and subgroups, are sent to subscribers based on the fields they have selected. The registration form includes links to the
